

2024

# First Responder Training

## Who should attend?

IAG's Recognition and Evaluation of Autism & Developmental Disability Training is tailored for people involved with individuals with autism and other developmental differences. The training aims to enhance preparedness for emergencies and improve the safety of these individuals.

## Topics will include:

- Tips for recognition and best communication techniques.
- Understanding safe scene management strategies.
- Review of de-escalation techniques and why they are important.
- introduce resources to assist first responders beyond training.

The training will include a Certificate of Attendance and Continuing Education Credits. Breakfast will be served.

## About IAG

Interaction Advisory Group was founded in 2015 to provide customized disability awareness training for first responders as well as other public service officials, educators, and private sector workers. Interaction Advisory Group is focused on the dynamics between you and people with disabilities to achieve the best possible outcome during every interaction.
